

Netflix Interview Handbook

1. Company Overview

Netflix is the world's leading streaming service. Its culture is defined by the "Culture Memo," emphasizing "Freedom and Responsibility" and the "Keeper Test."

2. Hiring Process (2025-2026)

Netflix's process is highly team-specific but generally includes:

- **Recruiter Screen:** 30 mins, focusing on culture fit.
- **Hiring Manager Screen:** 30-45 mins, deep dive into background.
- **Technical Screen:** 60 mins (CoderPad), practical coding task.
- **Onsite Loop:** 5-6 rounds:
 - **Coding Round (1):** Algorithmic and practical.
 - **System Design (1-2):** High priority, focus on trade-offs.
 - **Data Modeling (1):** Translating business needs to data structures.
 - **Behavioral (2):** Extensive culture memo discussion.

3. Culture Memo & Behavioral

Netflix places extreme importance on its culture.

- **The Keeper Test:** "If you wanted to leave, would I fight to keep you?"
- **Radical Candor:** Giving and receiving honest feedback.
- **Context, Not Control:** Leaders provide the context, and engineers make decisions.

4. Data Structures & Algorithms (DSA)

Frequently Asked Problems

Topic	Problem Example	Difficulty
Design	Implement a TTL Cache, Design an LRU Cache	Medium
Graphs	Cycle Detection in Content Graphs	Medium
Strings/Arrays	Longest Substring Without Repeating Characters	Medium
Concurrency	Multi-threaded data processing	Hard

5. Machine Learning & AI

- **Personalization:** Designing recommendation engines for millions of users.
- **Streaming Optimization:** Using ML to predict network bandwidth and optimize bitrate.
- **Content Analysis:** Automated tagging and thumbnail generation using AI.

6. System Design

- **High Priority:** Netflix system design focuses on global scale and fault tolerance.
- **Topics:** Multi-region architecture, CDN (Open Connect), Chaos Engineering.
- **Common Questions:** Design a Video Streaming Platform, Design a Fault-Tolerant Recommendation Service.

7. Data Modeling

- **Focus:** Modeling complex business domains (e.g., ad targeting, billing, content rights).
- **Example:** “Describe the data models needed for an advertiser to start a campaign.”

8. Preparation Tips

- Read the Netflix Culture Memo multiple times.
- Be prepared for practical, non-LeetCode style coding questions.

- Understand AWS services and how Netflix uses them at scale.
