

Zoho Interview Handbook

1. Company Overview

Zoho is a global leader in cloud software and business tools. It is known for its “Zoho Schools” and a hiring process that values logic and coding over degrees.

2. Hiring Process (2025-2026)

Zoho's process is unique and often involves 5-6 rounds:

- **Round 1: Aptitude & Output-Based Coding:** Basic math and C/Java/Python output questions.
- **Round 2: Basic Programming:** 5-6 coding problems (Easy to Medium) to be solved in 2-3 hours.
- **Round 3: Advanced Programming:** 1 complex problem (Machine Coding) to be solved in 3-4 hours.
- **Round 4: Technical Interview:** Deep dive into your code and CS fundamentals.
- **Round 5: HR Interview:** Cultural fit and communication.

3. Advanced Programming Round (Machine Coding)

- **Objective:** Build a small, working application or module.
- **Common Problems:** Design a Railway Reservation System, Design a Taxi Booking Application, Design a Social Media Feed.
- **Focus:** Logic, OOD, and handling complex constraints.

4. Data Structures & Algorithms (DSA)

Frequently Asked Problems

Topic	Problem Example	Difficulty
Arrays	Matrix Rotation, Spiral Matrix	Medium
Strings	Look and Say Sequence, String Pattern Matching	Medium
Recursion	Tower of Hanoi, N-Queens	Medium
Sorting	Implement QuickSort/MergeSort from scratch	Medium

5. Machine Learning & AI

- **Zia (Zoho AI):** Knowledge of Zoho's AI assistant.
- **Business AI:** Using AI for sentiment analysis in emails and CRM lead scoring.
- **NLP:** Designing chatbots for customer support.

6. Technical Interview Focus

- **Language Proficiency:** Deep knowledge of C, Java, or Python.
- **OOPS:** Classes, Inheritance, Polymorphism, Encapsulation.
- **DBMS:** SQL queries, Joins, Normalization.

7. Behavioral Questions

- "Why Zoho?"
- "Are you willing to work in a non-metro location (like Tenkasi)?"
- "How do you handle learning new technologies?"

8. Preparation Tips

- Focus on logic and problem-solving rather than competitive programming.

- Practice building small applications from scratch (without frameworks).
- Be prepared for long coding marathons (Round 2 and 3).
